

CIEL Fixed Assets

CIEL Fixed Assets is a cost management program for assets and depreciation, irrespective of the number of assets. The statistics in local and foreign currency keeps you updated with the real-time situation of your assets.

	Single station	Network - unlimited number of computers
Price Fixed Assets	560 RON	1300 RON
Price Maintenance contract signed in the same day as the acquisition of the product	400 RON	720 RON
Price Maintenance Contract	500 RON	900 RON

The maintenance contract is signed for 12 months and provides you with: telephone technical assistance and legislative and functional updates of the application

STRONG POINTS

- The application allows the recalculation of assets at any previous or future date
- Allows the management of total and partial sales operations
- The period of depreciation is automatically calculated according to the classification code
- The program helps you to plan fixed asset costs by cost centres and period
- You obtain comparative studies for the depreciations reported at the depreciated value or regarding the budgets planned against the budgets registered
- Allows you to choose the type of depreciation: linear, accelerated, regressive or without depreciation
- Allows you to group and analyse assets per categories, locations, budget codes or storage
- Offers the possibility of making re-evaluations due to inflation
- Allows you to work with an unlimited number of users
- Communicates in real time with the CIEL Accountancy application

FEATURES

1. General

- The application is delivered with a "Example" company, in which you can perform tests and useful exercises as long while you learn to use the application
